

KASP is a portable solar charging beacon. It can be recharged with sunlight or with a USB type C cable. It has a handle for easy transport, but if it is not used it remains folded and perfectly integrated thanks to its design. It allows to regulate the intensity and temperature of the light (2700K or 3000K) and has the night function: an option that when activated, will automatically turn on the beacon when it detects that there is less than 30lm around it. Therefore, it is ideal for restaurant and hotel terraces. It is also an ecological luminaire because by using the sun's energy, it reduces electricity consumption. You can also turn the beacon into a wall lamp thanks to the accessory ref. 71914, which is not included. This is the version that measures 30cm in length. Lighting solutions designed for

General characteristics

Fixation	Table, Floor, Wall
Type	III
IP	65
Switch type	On/Off
included battery	Yes20h
Max. Power	2.2W
IK	04

Material

Body/Structure	Aluminium
Diffuser	PC
Finish	
Diffuser	Transparent

Lighting characteristics

Light source included	Yes
Light source	SMD LED
Adjustable colour temperature	Yes
LM	150lm
CRI	>80
Light direction	Ambient lighting
Energy classification	G
Colour temperature range	2700 - 3000K

Driver

Requires Driver	Yes
